Benchmarking Performance

Understanding your brand's social media performance starts with knowing what's typical in your industry. This report explores comprehensive benchmarks across key metrics and social channels, including TikTok, Instagram and YouTube. These insights help set clear goals, strengthen content strategy and support faster audience growth.

About the Data

For the Issue 1 2026 Social Media Benchmark Reports, Dash Social pulled a sample of global companies across TikTok (n=1,361), Instagram (n=3,363), and YouTube (n=616), analyzing their activity between July 1, 2025 – December 31, 2025, to determine average performance against a predetermined set of KPIs. These benchmarks include organic, boosted, and promoted content but exclude paid ads. They apply to handles with at least 1K followers, covering both customers and non-customers. The results have been published in separate reports broken down into the following industries: beauty, CPG, children and baby, fashion, food and beverage, health and wellness, home goods, luxury, media and entertainment, publishing, retail, and travel and hospitality.

Defining the Home Goods Industry

The home goods industry is the sector for lifestyle products and decor for consumers looking for inspiration to transform their living space.

KPIs

Average Monthly Growth Rate

The average number of followers added on a monthly basis.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Average Reach Per Post

The average number of unique accounts that see your post.

Why It Matters: It helps brands understand the number of unique people its message reaches. This is important because it provides insight into brand awareness.

Average Entertainment Score (TikTok and Instagram Reels)

The Entertainment Score is a proprietary Dash Social metric and is scored against a global database of industry benchmarks.

Why It Matters: It helps brands understand how entertained its audience is by a TikTok or Reel.

Average Engagement Rate

The average engagement each post receives. Each platform calculates engagement rate differently.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Total Social Impact

Total Social Impact Score (TSI) is Dash Social's proprietary metric that measures your brand's full presence across modern social.

Why It Matters: Identify which content and channels have the biggest impact.

Average Number of Weekly Posts

The average number of posts brands share per week.

Why It Matters: It helps determine the right cadence for posting.

Average Video Views / Views

The average number of views each video receives, this includes rewatches.

Why It Matters: Users watching video more often have a higher likelihood of remembering brand messages or products.

Average Shares Per Post

The average number of times each piece of content is shared.

Why It Matters: Shares indicate that content resonates with users and is deemed 'shareable'.

Average Comments Per Post

The average number of comments that each post receives.

Why It Matters: Comments signify community and suggest that users connect with the video.

Cross-Channel Trends

Every Platform Has a Strategic Role

TikTok leads in engagement rate, Instagram is becoming a stronger discovery channel with 25% more reach per post than TikTok, and YouTube continues to lead in sustained attention, with an average view rate of 90%. For brands, performance isn't driven by showing up everywhere, it's done by leveraging each platform for what it does best.

Discovery Is Growing Faster than Engagement

Views are growing on TikTok (+3%) and Instagram (+27%), putting more content in front of more people than ever before. When that happens, engagement rates dip, and that's okay. Wider reach doesn't always lead to a deeper connection. The key is being more intentional as your audience grows. Focus on making content that resonates. The brands winning right now aren't chasing engagement rates, they're creating content that earns attention at scale.

Measuring Success on Each Platform is not Apples to Apples

On TikTok, likes, comments, shares, and watch time indicate if content is resonating. On Instagram, engagement shows up in shares and saves, which extend reach. On YouTube, views and watch time are the clearest signs that content is holding attention. What works on one platform will not always work on another, and content should feel native to each channel.

Dash Social Insight

Platform strategies aren't interchangeable. TikTok sparks conversation and visible engagement. Instagram is becoming a stronger engine to extend reach and drive shares. YouTube is where attention lasts longer. Build your strategy around what each platform does best.

@thedodo

TikTok Trends

Viewership Is Trending Up.

Even with a dip from 3.9% to 3.4%, TikTok remains the strongest platform for engagement across channels. This shift aligns with a 3% increase in views. Pointing to the fact that as content reaches a larger audience, maintaining the same level of connection becomes harder

Follower Growth Slows, Indicating Shift in Behavior.

Brands now post eight times per week on average, the highest level on record. But our latest Social Media Trends report shows that brands posting fewer than six times per week see 93% higher engagement. More posting does not drive better results. Intentional posting does.

Most Users Do Not Finish Videos.

Top performers show that it's possible to drive awareness and connection at the same time. The data shows that large brands lead in reach, engagement, and Entertainment Score. Prioritizing all three metrics together drives better results.

@sajewellness

Instagram Trends

Reels Drive the Strongest Performance

With a 2.7% engagement rate, Reels generate nearly double the performance of carousel posts (1.4%) and static images (1.3%). For brands looking to drive deeper connection, Reels are the clearest format to prioritize.

The Best Content Travels Beyond the Feed

On average, brand posts generate 1.1K shares (+9%), showing that strong content keeps working after it's published. Instagram is more discoverable than ever, and posts aren't limited to a single moment. They build momentum over time.

Attention is Won in the First 4 Seconds

Users watch a Reel for an average of four seconds before they move on. Open with a clear hook to keep them watching.

[@sourpatchkids](#)

YouTube Trends

More People are Watching, and They're Watching Longer

Across formats, video views are up 30%, with an average completion rate of 90% highlight that YouTube is built for retention. Success is less about interaction and more about watch time, and keeping people on the platform.

Shorts Accelerates Viewership

Shorts views have jumped 109%, but on-demand videos are up just 14%. This shows a growing preference for short-form content on the platform, and a clear opportunity for brands looking to grow their YouTube strategy.

Shorts and On-Demand Play Distinct Roles in Capturing Attention

Shorts are driving more engagement, averaging 502 interactions per video compared to 402 for on-demand. On-demand leads in reach, with 229.4K views per video versus 75.9K for Shorts. Success on YouTube doesn't hinge on one format. Each plays its own role in earning attention.

@sephora

Brands Are Posting More, but Performance Isn't Scaling

 Video views are down 11%, and engagement has dropped from 2.4% to 1.4%. As brands increase their weekly posting cadence from 3 to 7, performance has not scaled at the same rate. An intentional approach matters. Identify what performs, then repeat those patterns to drive engagement.

 Views are up 45%, but engagement rate has fallen from 2.3% to 1.5%. Content is more discoverable, but fewer are engaging with it. Reels drive the strongest reach and engagement, so brands should prioritize short-form video to help close the gap.

 On-Demand views are down 30%, but Shorts views are up 127%. Brands are leaning into that shift, doubling weekly Shorts from one to two. Viewers are engaged, watching 99% of each video on average. Shorts are where attention is building, so brands should keep investing in them.

 **Dash Social Insight**

Brands are posting more video than ever before, but views are down across TikTok and YouTube, and engagement has declined. That makes a focused approach more important. Brands need to create content people want to watch: videos that lead with value and align with audience interests.

Average Home Goods Engagement Rate and Video Views Per Post

H1 2026

	TikTok	Instagram	YouTube
Engagement Rate	1.4% -42%	1.5% -35%	- N/A
Video Views	119.4K -11%	104.3K +45%	53.2K -2%

Social Is Not One-Size-Fits-All

Every channel, format, and metric tells a different story, making the full picture harder to see.

There's no universal playbook, only diverse paths to impact. As this shift accelerates, performance becomes harder to read, with impact spread across fragmented KPIs.

Total Social Impact (TSI) brings clarity to that complexity by showing which channels drive the largest share of overall impact and revealing what's accelerating performance and what's slowing it down.

TSI is Dash Social's proprietary metric that quantifies cross-channel performance by weighting and balancing dozens of data points into one consistent, normalized score.
