Benchmarking Performance

Understanding your brand's social media performance starts with knowing what's typical in your industry. This report explores comprehensive benchmarks across key metrics and social channels, including TikTok, Instagram and YouTube. These insights help set clear goals, strengthen content strategy and support faster audience growth.

About the Data

For the Issue 1 2026 Social Media Benchmark Reports, Dash Social pulled a sample of global companies across TikTok (n=1,361), Instagram (n=3,363), and YouTube (n=616), analyzing their activity between July 1, 2025 – December 31, 2025, to determine average performance against a predetermined set of KPIs. These benchmarks include organic, boosted, and promoted content but exclude paid ads. They apply to handles with at least 1K followers, covering both customers and non-customers. The results have been published in separate reports broken down into the following industries: beauty, CPG, children and baby, fashion, food and beverage, health and wellness, home goods, luxury, media and entertainment, publishing, retail, and travel and hospitality.

Defining the Publishing Industry

The publishing industry includes brands that produce and distribute written content such as books, magazines, and digital articles.

KPIs

Average Monthly Growth Rate

The average number of followers added on a monthly basis.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Average Reach Per Post

The average number of unique accounts that see your post.

Why It Matters: It helps brands understand the number of unique people its message reaches. This is important because it provides insight into brand awareness.

Average Entertainment Score (TikTok and Instagram Reels)

The Entertainment Score is a proprietary Dash Social metric and is scored against a global database of industry benchmarks.

Why It Matters: It helps brands understand how entertained its audience is by a TikTok or Reel.

Average Engagement Rate

The average engagement each post receives. Each platform calculates engagement rate differently.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Total Social Impact

Total Social Impact Score (TSI) is Dash Social's proprietary metric that measures your brand's full presence across modern social.

Why It Matters: Identify which content and channels have the biggest impact.

Average Number of Weekly Posts

The average number of posts brands share per week.

Why It Matters: It helps determine the right cadence for posting.

Average Video Views / Views

The average number of views each video receives, this includes rewatches.

Why It Matters: Users watching video more often have a higher likelihood of remembering brand messages or products.

Average Shares Per Post

The average number of times each piece of content is shared.

Why It Matters: Shares indicate that content resonates with users and is deemed 'shareable'.

Average Comments Per Post

The average number of comments that each post receives.

Why It Matters: Comments signify community and suggest that users connect with the video.

Cross-Channel Trends

Every Platform Has a Strategic Role

TikTok leads in engagement rate, Instagram is becoming a stronger discovery channel with 25% more reach per post than TikTok, and YouTube continues to lead in sustained attention, with an average view rate of 90%. For brands, performance isn't driven by showing up everywhere, it's done by leveraging each platform for what it does best.

Discovery Is Growing Faster than Engagement

Views are growing on TikTok (+3%) and Instagram (+27%), putting more content in front of more people than ever before. When that happens, engagement rates dip, and that's okay. Wider reach doesn't always lead to a deeper connection. The key is being more intentional as your audience grows. Focus on making content that resonates. The brands winning right now aren't chasing engagement rates, they're creating content that earns attention at scale.

Measuring Success on Each Platform is not Apples to Apples

On TikTok, likes, comments, shares, and watch time indicate if content is resonating. On Instagram, engagement shows up in shares and saves, which extend reach. On YouTube, views and watch time are the clearest signs that content is holding attention. What works on one platform will not always work on another, and content should feel native to each channel.

Dash Social Insight

Platform strategies aren't interchangeable. TikTok sparks conversation and visible engagement. Instagram is becoming a stronger engine to extend reach and drive shares. YouTube is where attention lasts longer. Build your strategy around what each platform does best.

TikTok Trends

TikTok Continues to Lead in Engagement

Even with a dip from 3.9% to 3.4%, TikTok remains the strongest platform for engagement across channels. This shift aligns with a 3% increase in views. Pointing to the fact that as content reaches a larger audience, maintaining the same level of connection becomes harder

Posting More Doesn't Mean Better Performance

Brands now post eight times per week on average, the highest level on record. But our latest Social Media Trends report shows that brands posting fewer than six times per week see 93% higher engagement. More posting does not drive better results. Intentional posting does.

Top TikTok Content Wins on More Than One Metric

Top performers show that it's possible to drive awareness and connection at the same time. The data shows that large brands lead in reach, engagement, and Entertainment Score. Prioritizing all three metrics together drives better results.

@sajewellness

Instagram Trends

Reels Drive the Strongest Performance

With a 2.7% engagement rate, Reels generate nearly double the performance of carousel posts (1.4%) and static images (1.3%). For brands looking to drive deeper connection, Reels are the clearest format to prioritize.

The Best Content Travels Beyond the Feed

On average, brand posts generate 1.1K shares (+9%), showing that strong content keeps working after it's published. Instagram is more discoverable than ever, and posts aren't limited to a single moment. They build momentum over time.

Attention is Won in the First 4 Seconds

Users watch a Reel for an average of four seconds before they move on. Open with a clear hook to keep them watching.

[@allrecipes](#)

YouTube Trends

More People are Watching, and They're Watching Longer

Across formats, video views are up 30%, with an average completion rate of 90% highlight that YouTube is built for retention. Success is less about interaction and more about watch time, and keeping people on the platform.

Shorts Accelerates Viewership

Shorts views have jumped 109%, but on-demand videos are up just 14%. This shows a growing preference for short-form content on the platform, and a clear opportunity for brands looking to grow their YouTube strategy.

Shorts and On-Demand Play Distinct Roles in Capturing Attention

Shorts are driving more engagement, averaging 502 interactions per video compared to 402 for on-demand. On-demand leads in reach, with 229.4K views per video versus 75.9K for Shorts. Success on YouTube doesn't hinge on one format. Each plays its own role in earning attention.

[@sephora](#)

Publishing Brands Maintain Strong Performance Despite Platform Fluctuations

 Video views are down 14%, but remain strong overall, while engagement rate has climbed from 5.0% to 5.3%. Publishing brands continue to drive strong engagement from the audiences they reach.

 Views are up 25%, but engagement rate has fallen from 2.6% to 1.9%. Even with that drop, the increase in views points to more content discovery on the platform. Single static posts are slightly stronger for reach, while Reels drive engagement, giving brands a chance to use different formats for different goals.

 Views are up 75% across both On-Demand and Shorts, but viewers are only watching about half of each video on average (54%). To improve retention, look at the videos people actually stick with, then use those patterns to shape what you make next.

 **Dash Social Insight**

Publishing brands are some of the strongest performers on social, but retention alone won't keep engagement from slipping. When interaction starts to drop, refresh the content mix, test new hooks and series, and give audiences a clearer reason to engage.

Average Publishing Engagement Rate and Video Views Per Post

H1 2026

			
Engagement Rate	5.3% +6%	1.9% -27%	- N/A
Video Views	211.3K -14%	529.8K +25%	36.2K +75%

Compared to six months prior

Engagement Rate Formulas
TikTok: Engagements/Video Views | Instagram: Engagements/Views

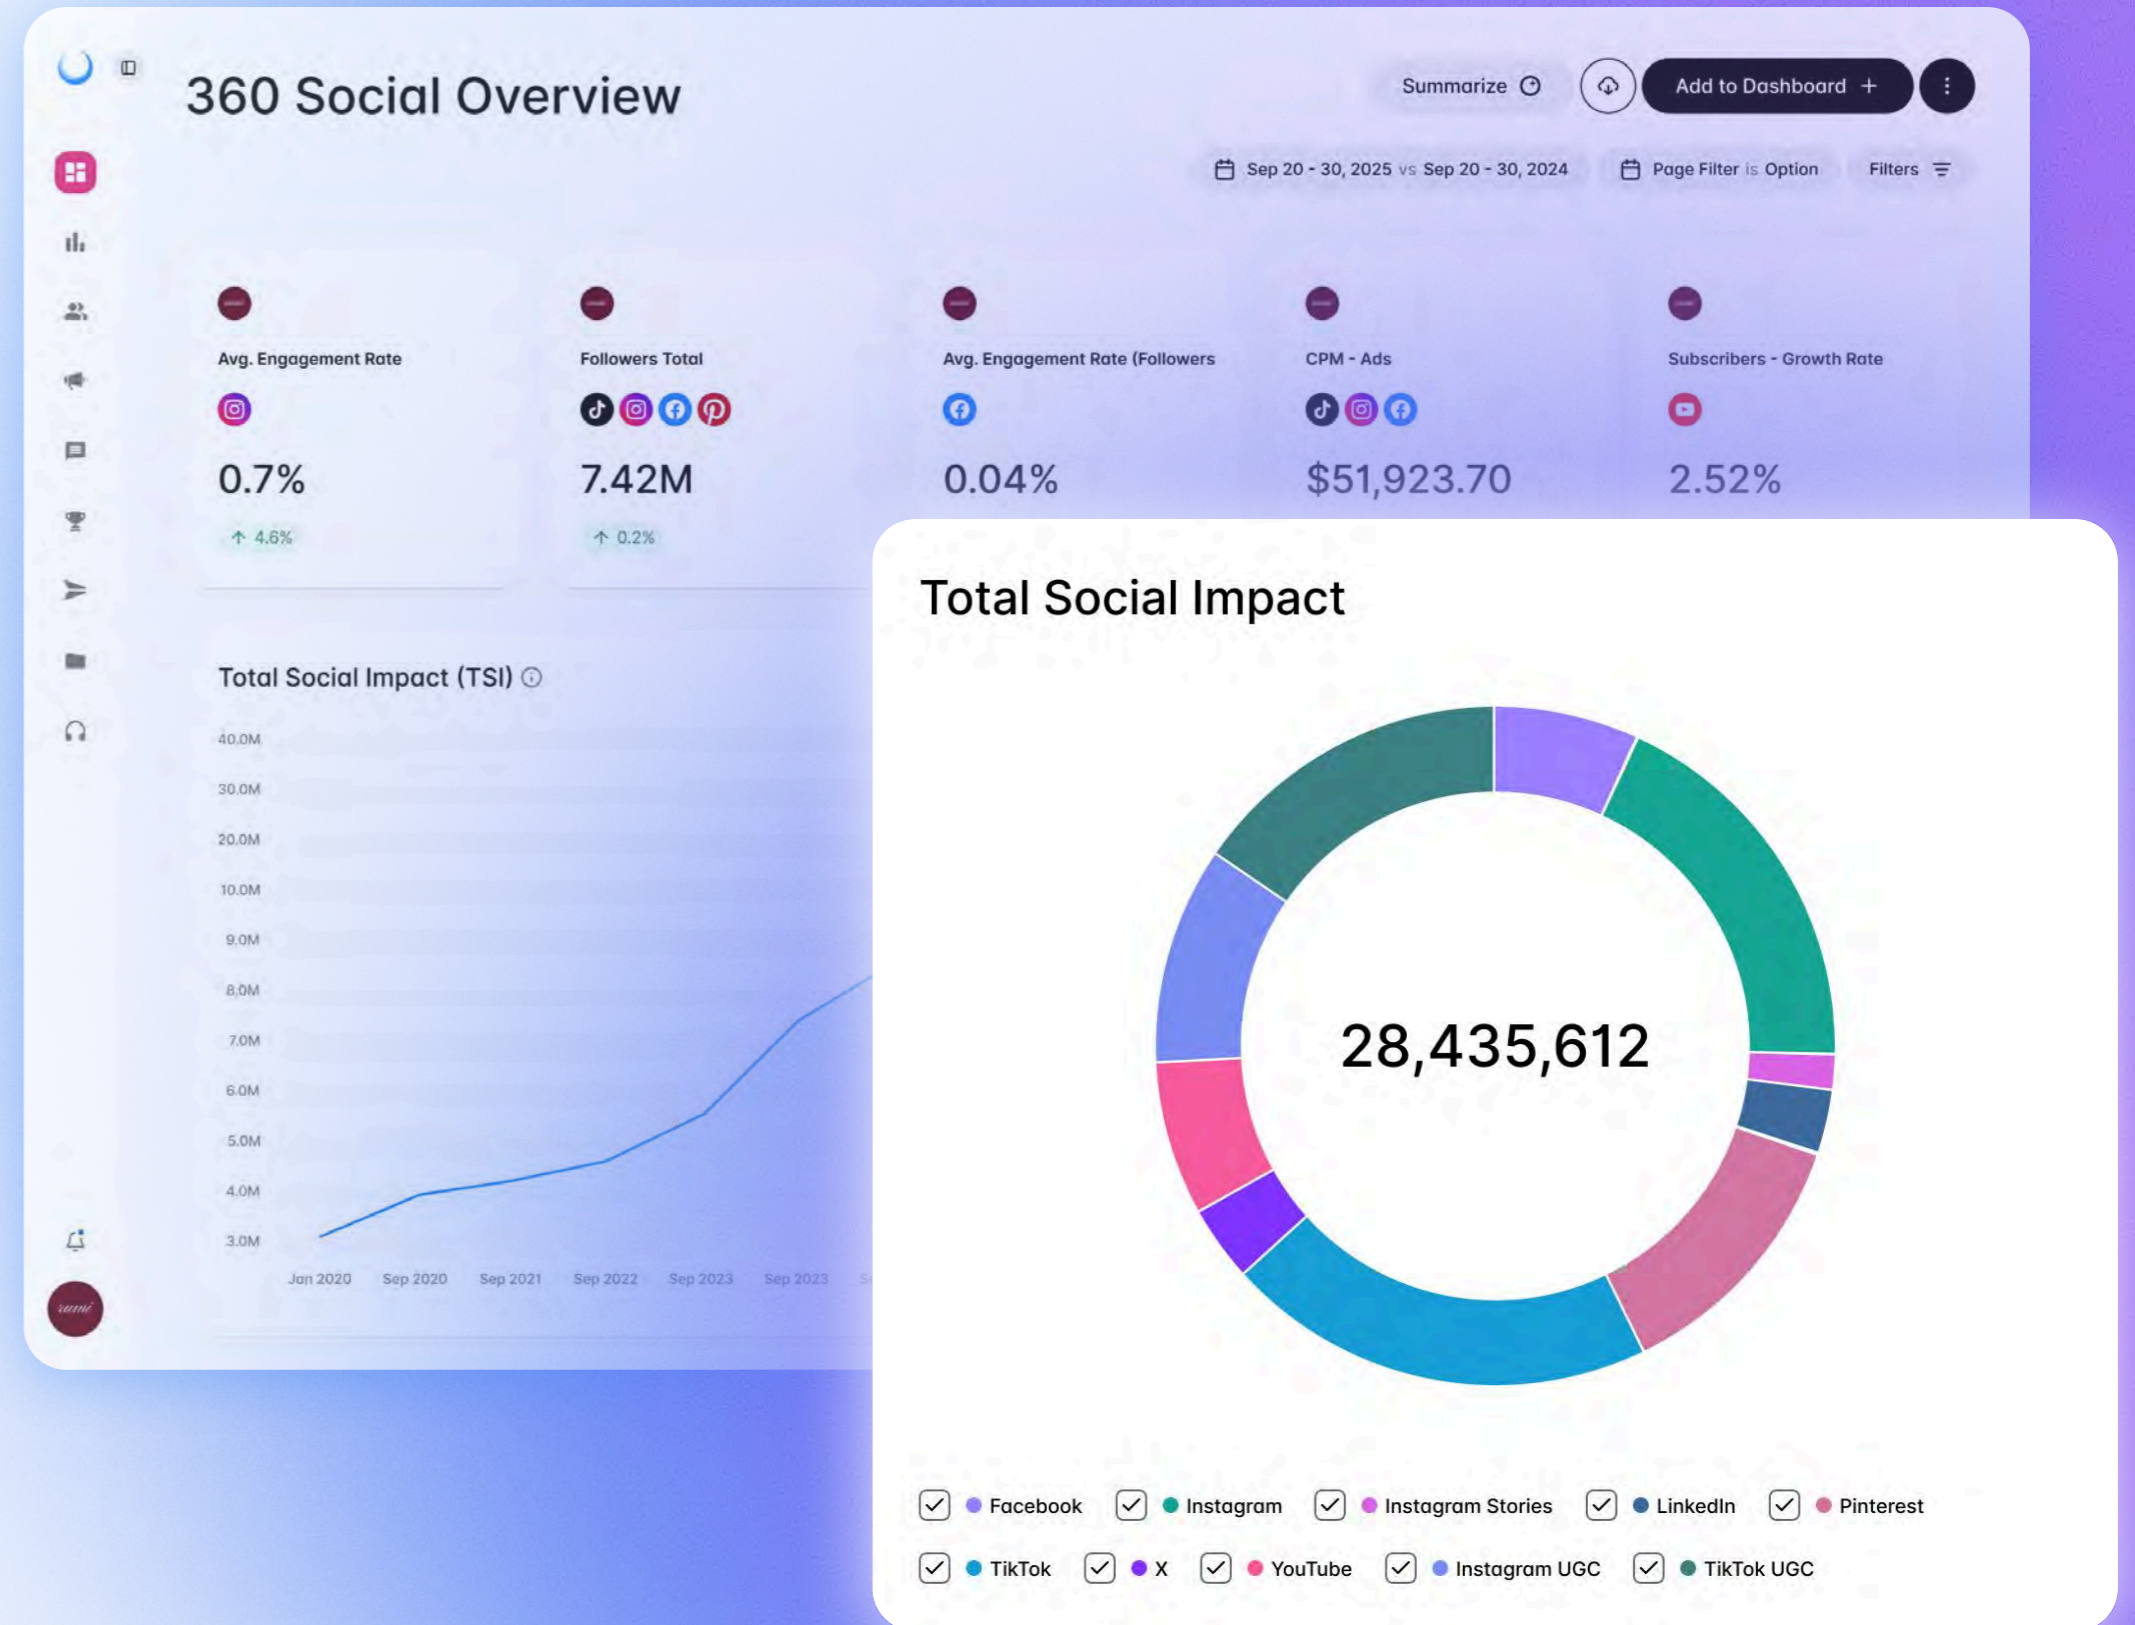

Social Is Not One-Size-Fits-All

Every channel, format, and metric tells a different story, making the full picture harder to see.

There's no universal playbook, only diverse paths to impact. As this shift accelerates, performance becomes harder to read, with impact spread across fragmented KPIs.

Total Social Impact (TSI) brings clarity to that complexity by showing which channels drive the largest share of overall impact and revealing what's accelerating performance and what's slowing it down.

TSI is Dash Social's proprietary metric that quantifies cross-channel performance by weighting and balancing dozens of data points into one consistent, normalized score.

Dash Social Insight

X remains a high-volume channel for the brands still active there, with frequent posting driving steady visibility. But audience growth continues to decline, and impressions remain low relative to follower count.

@ Average Threads Performance Across All Industries

	Followers	Weekly Posts	Monthly Growth Rate	Weekly Profile Views	Engagements Per Post	Likes Per Post	Replies Per Post
Overall	494.3K	18	1.1%	618.2K	76	68	4
Growing Brands <small>(0 – 100K Followers)</small>	44.7K	13	1.2%	36.7K	19	17	1
Established Brands <small>(100K – 300K Followers)</small>	179.6K	14	0.9%	103.0K	69	63	3
Large Brands <small>(300K+ Followers)</small>	1.2M	27	1.0%	1.7M	143	128	8
